Your Ultimate Frontend Toolkit

Boxput is a modern, blazing-fast collection of browser-based utilities. No server-side processing, no data logging. Just pure, powerful tools right in your browser.

Image Converter

Convert images to PNG, JPEG, or WEBP. High quality, client-side conversion.

LAUNCH TOOL

Image Compressor

Reduce image file size by adjusting the quality. Works best with JPEG.

LAUNCH TOOL

Image Cropper

Upload an image and select an area to crop. Simple and intuitive.

LAUNCH TOOL

Video to WebM Converter

A limited converter. Plays your video and re-records it into WebM format using MediaRecorder.

LAUNCH TOOL

Audio Trimmer

Trim audio files. Note: This re-encodes the audio, potentially changing quality.

LAUNCH TOOL

Audio to WAV Converter

Converts various audio formats to WAV. Note: This re-encodes the audio.
